Canada

Trade-marks Journal

Vol. 64 No. 3285

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Scientific, nautical, surveying, photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments, namely, electric circuit and electronic integrated circuit allowing the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electric circuit and electronic integrated circuit allowing the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; apparatus for recording, transmission or reproduction of sound or images, namely, electric circuit and electronic integrated circuit allowing the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; blank magnetic data carriers, namely shoe-embedded chips for transmitting the data about the users' fitness activity; blank sound recording discs; data processing equipment, namely, electric circuit and electronic integrated circuit allowing the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, and computers; computer software for use in the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers, for computer aided software engineering; computer software packages for use in the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; computer programs for data processing for use in the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; software programmable microprocessors; electronic notice boards; electronic display panels; electronic control panels; LDC panels; electronic process control apparatus, namely electronic controllers allowing via electronic signals the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electronic circuits; electronic distance meters; electronic control integrated systems for measuring and controlling the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electronic control units for measuring and controlling the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; blank electronic data carriers, namely shoe-embedded electronic chips for the manufacture of integrated circuits; blank integrated circuit cards; electronic control circuits used for conducting, switching, transforming, accumulating, regulating or controlling electricity and energy; electronic logic circuits used for conducting, switching, transforming, accumulating, regulating or controlling electricity and energy; electronic touch pads; electronic sensors for sensing the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electronic semi-conductors; electronic measurement sensors for measuring and sensing the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electronic memory units for measuring and controlling the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electronic memory circuits used for conducting, switching, transforming, accumulating, regulating and controlling electricity and energy; electronic programming units for measuring and controlling the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electronic integrated circuits; electronically encoded identity wristbands; electronic memory integrated circuit chips; downloadable electronic publications, namely, magazines and brochure in the field of footwear, headgear and clothes; electric and electronic data carriers, namely electric circuits and electronic integrated circuits and electronic chips for the manufacture of integrated circuits; electrical circuits; testing apparatus for electronic equipment, namely, electric circuit and electronic integrated circuit allowing the modification of temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; radio, telephone, television and video transmitters of electronic signals; information storage apparatus [electric or electronic], namely, electric circuit and electronic integrated circuit allowing the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; testing apparatus for checking electronic devices, namely, electric circuit and electronic integrated circuit allowing the modification of the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electronic control systems for manually operating valves; remote control stations for controlling the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electric control stations for measuring and controlling the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; electronic control stations for measuring and controlling the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers; microelectronic components, namely electronic chips for the manufacture of integrated circuits and electric circuit for controlling the temperature, volume, electric conductivity, thermal conductivity, hydraulic conductivity, mechanical resistance, hardness, thickness and elasticity of a wearable product, namely wearable electronic soles and shoes for keeping track of the users' fitness activity, smart watches, bracelets, wrist bands, and electronic portable fitness activity trackers;
